Cataloguing Import/Export User Services Reports Title In-Process Data Operation

Cataloguing is the most important module of the LMS from the point of view of retrieval of information. **Retrieval of accurate/correct information** depends upon how much care was taken while **feeding accurate bibliographic data**. Please ensure you follow international standards (like AACR) for field values and selection of keywords, subject-headings etc. SOUL uses MARC21 format to create records for the resources. MARC format will help us exchange information to and from other databases. MARC format supports several data field. Depending upon the size of the library and user-needs, you may choose selected important fields for your database. SOUL allows you to import data in MARC21 format too. This will also help you in saving data-entry effort and maintain accuracy (MARC records can be downloaded from LC (Library of Congress), IndCat (INFLIBNET Centre's Union database) or other OPACs for most of the foreign publications) – the mechanism is discussed later in this section.

The logical step after accessioning is to catalogue the documents received from the suppliers. There are two ways to technically process these resources – one is to Import MARC records from other OPACs available from well-known National Libraries like Library of Congress or IndCat (INFLIBNET) . You only will have to check accuracy of the imported data and may have to customise certain field-values to your needs (like key-terms, price, ISBN – which might be of international/foreign edition, in few cases Class Numbers to suit local users need, etc) before it becomes a part of SOUL database. The second is to manually input all the necessary data elements into appropriate fields of the options available.

You may remember that under Administration Module, you have created necessary data-entry templates needed for your library (you may use readily available MARC template with all the fields or the one customised for your library). Be consistent in using either of them.

OPAC

The screenshot displays the SOUL 2.0 OPAC interface. The main window is titled "OPAC -> Simple Search". The search criteria are set to "Author" with the value "kothari". The search options include "Any Where In Word" (checked) and "Exact Search" (unchecked). The results table is as follows:

Sr.No.	Title	Author	Author	Call No.	Location	Accession No.	Status	L
1	Research Methodology, meth	Kothari, C.R. and Garg, Gaurav.	Kothari, C.R. and	001.42/KOT		1733	Available	N
2	Bhasha Parichay ane Gujarati	Kothari, Jayant.	Kothari, Jayant/	801.4709/KOT		1986	Available	er

Below the table, there is a tooltip for the second entry: "Bhasha Parichay ane Gujarati Bhashanu Swaroop". The interface also includes a toolbar with buttons for "MARCXML (Export)", "Select All", "Edit", "Clear", "Show", "Previous", "Next", and "Close". The status bar at the bottom indicates "Library Name : Government Commerce College, Ahmedabad" and "Application Version : 2.0.0.12". The system tray shows the date and time as "11:02 AM 5/2/2024".
